

## S2PInsight™

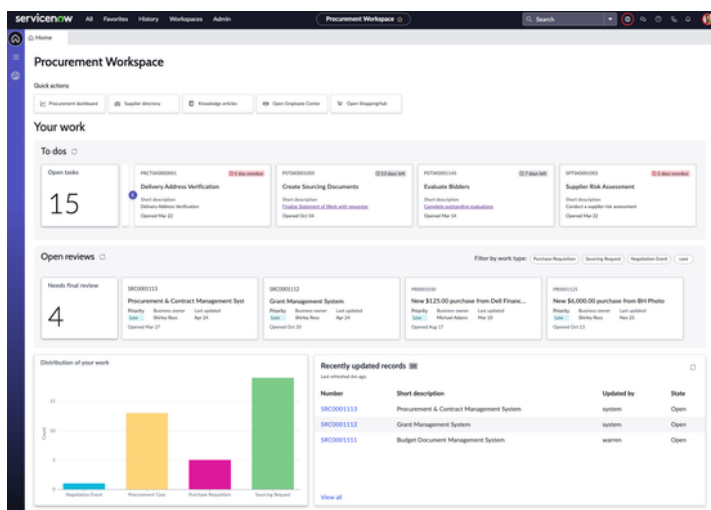

- End-to-end solution for Source to Pay built to support any size government agency or department
- Accelerates the entire workflow around Source to Pay by as much as 70%
- Combines document process automation™ from City Innovate with the power of ServiceNow's purpose built Source2Pay module

City Innovate and ServiceNow are proud to partner together to drive greater insight and accountability around the entire source-to-pay process. The largest government agencies in the U.S. depend on City Innovate to accelerate document production and turn the data hidden in documents into structured data for insertion into ERP and other systems of record.

The largest government agencies depend on City Innovate x ServiceNow to streamline, modernize, and accelerate their workflows, with enterprise-class SaaS solutions purpose-built for government.

**City Innovate's approach to Source to Pay starts with the insight that documents are the sticking point in the process; automate the production of documents accelerates the end-to-end process by 50-70%.**

**City Innovate provides the platform for Document Process Automation (DPA)**

- Replaces desktop applications with modern, cloud-based solutions that include collaboration and project management tools, to eliminate redundant data entry and ensure compliance with each jurisdiction's contracting standards.
- Documents produced on City Innovate's platform have built-in intelligence.
- Transforms process workflows by turning the unstructured data hidden in large document sets into actionable data for greater insight and accountability.
- Activates data hidden in documents that can then be injected into multiple systems within the government agency including ERP systems.
- From the experts in modernizing workflows around government procurement/contracting.

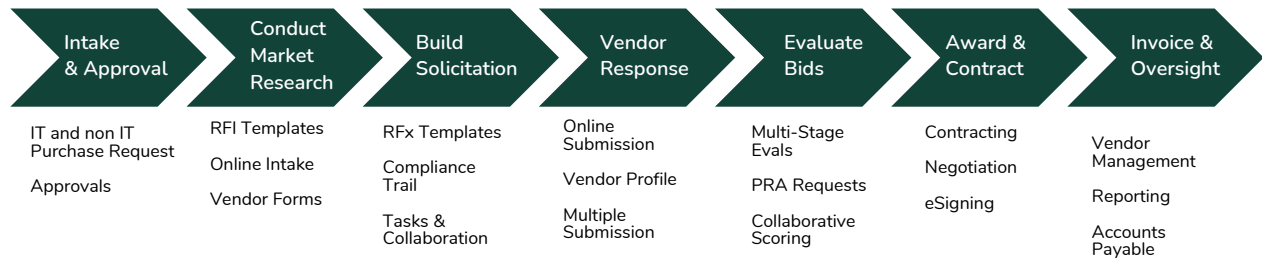

Speed + the accountability and rigorous oversight taxpayer's expect.

# S2PInsight™ - Source to Pay - powered by ServiceNow

ServiceNow is the global leader in enterprise service management with years of experience in scaling solutions for sourcing and vendor management to connect the source-to-pay process end-to-end. The ultimate goal of ServiceNow's solutions is to modernize processes in a way that is transformative for the enterprise, saving both time and money.

Since 2014, City Innovate has provided the people, processes, and technology needed to modernize the workflows around government procurement/contracting, grants, and budgeting. Our expertise is in Document Process Automation ... turning the data hidden inside documents into structured data for greater insight and accountability; thanks to ServiceNow that data can then be injected into the other systems that government agencies depend on for operations.
